

### 3-phase stator ROT504 driven by dual speed rotor control unit

Measurements at the stator cable terminal EX1100 between 1-2 and 2-3 and 1-3

Inductances: Must all be 26mH  $\pm 10\%$   
Resistances: Must all be 12 Ohms  $\pm 10\%$

**cable resistance** (10m single length) + 0.27 Ohms  
(3 x 1.31mm<sup>2</sup>) (15m single length) + 0.40 Ohms  
(20m single length) + 0.53 Ohms
